72ND ANNUAL Winter Clinic

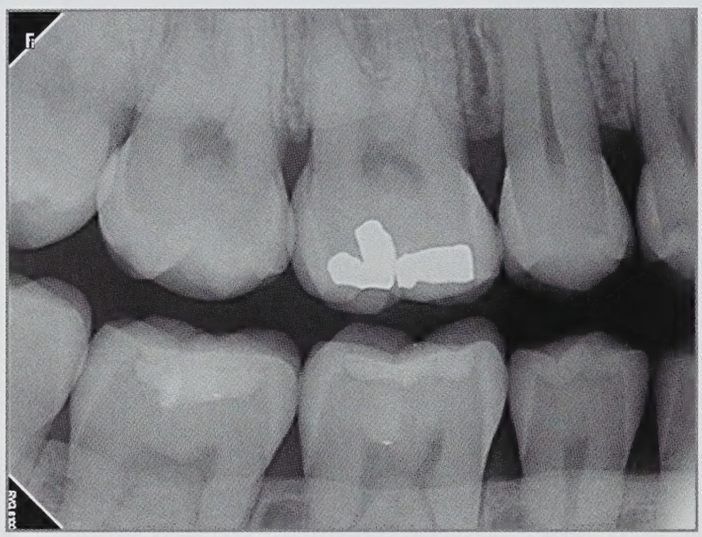
NOVEMBER 13 • 2009

METRO TORONTO CONVENTION CENTRE • SOUTH BUILDING

Kodak Dental Systems

Simply The Best Sensor.

The only digital sensor with film-quality images.*



Kodak RVG 6100 sensor
(20 lp/mm) with sharpness filter.

For a limited time, get a FREE RVG 6100 sensor when you buy two.**

The Kodak RVG 6100 digital radiography system delivers the clearest digital intraoral radiography images. And, it's the only sensor with Logicon caries detection software which enables dentists to find 20 percent more cases of caries penetrating into dentin than they were able to find without it, while not causing them to mistreat any additional healthy teeth.***

Get the facts at www.kodakdental.com/freeRVG, or call 800.933.8031 to schedule a demo.

WINTER CLINIC IMPORTANT INFORMATION

Pre-Registration & On-Site Registration:
Fees for all categories are payable to the Toronto Academy of Dentistry.

Please use one form per office, registering attendees under applicable category. (Only if necessary, please photocopy to add additional registrants per office).

The registration fee includes admission to the Clinics, Exhibits, Lunch AND **Tribute Show**.

Enjoy a Cocktail Reception, sponsored by the Toronto Academy of Dentistry
From 4:30 p.m. – 6:00 p.m.

All registration fees include GST. (#123000879).

The office will accept NO REGISTRATIONS after Friday, November 6th, 2009. The office will be closed on Thursday, November 12, 2009 (the day before Winter Clinic) and Friday, November 13, 2009.

Association Membership:
ODA Members, regardless of their membership status, must have their full ODA dues paid prior to pre-registering or registering on-site. If current membership dues are not showing paid, non-member fees will apply.

ODHA, ODAA and RDT Membership fees must be paid to their associations prior to pre-registering. Please make sure the name (maiden or married surname) that appears on the registration form is the same that is listed with your association.

Payment of Fees:
Make cheques payable to the Toronto Academy of Dentistry and mail to:
Ste. 207-970 Lawrence Ave W
Toronto, Ontario M6A 3B6
Fax registration forms along with credit card number to
(416) 967-5081

Registration forms faxed indicating payment by cheque will not be accepted and must be mailed along with the cheque.
OR - REGISTER ONLINE!!!! WWW.TORDENT.COM

Limited Attendance:

invisalign® Clear Essentials 1 Presented by
Dr Tony Gadbois
This one day course is designed specifically for the general practitioner and team members that wish to incorporate the Invisalign® system into their practice. This case based training provides participants with the clinical and operational confidence to successfully treat a range of highly predictable cases.

invisalign® Clear Essentials 2 Presented by
Dr Carlyn Phucas
A lecture and workshop designed for GPs who currently offer Invisalign in their practice. Advanced topics and techniques using Invisalign are discussed to help doctors effectively select and treat more complex malocclusions. We recommend that participants have experience submitting and finishing Invisalign cases prior to attending Invisalign: Clear Essentials II. Attendees must be Invisalign Certified.

Doctors are encouraged to bring cases to Invisalign: Clear Essentials II – the orthodontic instructor will select some cases to discuss during part of the course and be available for Q&A after the course.

Cancellation and Refunds:
You will be issued a full refund, less a $25.00 administration fee until October 20, 2009. Between October 21 and October 27, 2009, a 50% refund. **There will be no refunds after October 27, 2009.**

Badge Pick-up:
Badges will be mailed to attendees who register on or before October 10, 2009. If you do not pre-register, you may pick up your badge on the day of Winter Clinic. Your badge must be worn at all times. If lost or you do not have it on the day of Winter Clinic, a replacement badge will be issued on-site ONLY, with valid photo I.D. for a fee of $50.00. There will be no exceptions.

Exhibit Hours, Clinics and Lunch:
Accreditation Desks are on the Exhibit Floor and open from 2:00 p.m. – 5:00 p.m. Exhibits are open from 10:00 a.m. – 6:00 p.m. All exhibits are located in Halls D &E on the exhibit floor of the SOUTH Building of the Convention Centre. SUPPORT YOUR EXHIBITORS!!
Be sure to attend one of over 20 comprehensive ADA C·E·R·P lectures of interest to every member of the dental team!

"Power Hour" sessions are informative and engaging one-hour sessions covering several aspects of dentistry. Power Hours allow you to get the most out of your day by enabling you to attend both the clinical programs and the exhibit floor.

Lunch - 12:00-2:00 pm in Exhibit Halls D & E

METRO TORONTO CONVENTION CENTRE
SOUTH BUILDING

Attendance Verification for RCDSO Continuing Education Credit:
Dentists will receive 6 RCDSO credits for attending Winter Clinic. Verification cards will be attached to your badges. This card must be stamped for Continuing Education credit. Accreditation desks are on the exhibit floor.

Your name badge is your receipt of payment and should be retained for income tax purposes.

ODAA members receive 4 credits.

Remember to register your staff. They need continuing education credits too!

Visiting Toronto?
Attending Winter Clinic at the Metro Toronto Convention Centre you will find yourself in the heart of Toronto, steps away from one of the finest entertainment districts any city can offer. Within walking distance you can dine in the finest restaurants, take in world-class entertainment or take in a sporting event!

What's Happening in Toronto During Winter Clinic

Hockey Hall of Fame / PATH

The Hockey Hall of Fame was founded in 1943 to establish a memorial to those who have developed Canada's great winter sport -- ice hockey. Incorporated in 1983, Hockey Hall of Fame and Museum ("HHFM") exists in order to collect, preserve, research and exhibit the history of the game of ice hockey, and in particular, those who have made outstanding contributions and achievements in the development of the game.

The Hockey Hall of Fame is connected to downtown Toronto's "PATH" system. This is an underground network of buildings, stores, restaurants, and hotels that are connected by pathways. So, for example, if your family is staying at a hotel connected to the PATH system during the coldest day of the year in Toronto, you could leave all your winter clothing in the hotel and PATH your way to the Hockey Hall of Fame in perfect comfort.

Queens Quay Terminal

Queen's Quay Terminal is an exciting shopping experience located in the heart of Toronto's Harbourfront district.

Built in 1926, the award-winning architecture features soaring ceilings, wide open spaces, and natural sunlight. The property was purchased by Brookfield in November 1997 and since then has undergone extensive upgrades.

Visit the following features of Queen's Quay Terminal:
Over 30 shops and boutiques
Restaurants including a Food Court
Sweeping views of Lake Ontario's Toronto Harbour

Our Academy

Vision

The Toronto Academy of Dentistry is a not for profit association representing the dentists of Toronto East, Toronto Central, Toronto North, and Toronto West Dental Societies of the Ontario Dental Association. It is recognized as a leading, responsible, accountable and benevolent link between dentists and the general public.

Mission

The TORONTO ACADEMY OF DENTISTRY, a respected leader and resource to the dental profession in the Metropolitan Toronto Area since 1890, is dedicated to enhancing the professional lives of its members through guidance, education and service.

Values

- To advance the art and science of dentistry
- To promote the highest ideals of dental practice
- To cultivate harmony and fellowship among members of the dental community

Strategic Priorities

The Toronto Academy of Dentistry considers the following issues as priorities in achieving its mission. Both Board and staff will focus attention and resources on these areas.

1. The Annual Winter Clinic
2. Assist and promote component societies
3. Public Relations: an experienced staff person to address general queries and complaints
4. Co-ordination of dental and fellowship functions within the GTA
5. Mediation services for the public
6. Communication with dental auxiliary organizations
7. Honourary Life Membership to recognize a dentist's ongoing service to the dental community.
8. Fellowship activities such as the Annual Golf Tournament, Curling Bonspiel and Ski Day.
9. Donations to charitable organizations through The Toronto Community Professional Dental Association
10. Information of new and emerging study groups.

Welcome to the 72nd Annual Winter Clinic

On behalf of the Toronto Academy of Dentistry, we welcome you to the 72nd Annual Winter Clinic on November 13, 2009 at the Metro Toronto Convention Center – south building.
The Winter Clinic is the largest one-day comprehensive meeting in North America. You and your staff will have the opportunity to meet and partake in a world-class clinical programme with speakers and exhibitors from across the dental industry.
Some of the highlights of this year's Winter Clinic include:

- A presentation of the Canadian Armed Forces, "Afghanistan as seen through the eyes of an Oral Maxillofacial Surgeon
- A programme sponsored by CDSPI entitled "Who is Minding Your Money"; which is particularly relevant in these troubled economic times.
- The University of Toronto Update in Dentistry Series
- A panel of Oral Health Journal Editors.

With these, and many more programmes and workshops developed exclusively for the Winter Clinic, plan to get the most out of your day by bringing your whole team with you to attend a variety of sessions that can later be discussed and shared among your group.

Be sure to also spend time in the exhibit hall and take advantage of the specials offered exclusively at the Winter Clinic. Bring a list and make your year end purchases from exhibitors who are keen to make a deal.

Finally, make your day more fun by taking advantage of this year's new silent auction using "Winter Clinic Bucks", which you will get on registration. Cap off the day by mixing with your friends and enjoying a cocktail. Make plans with your colleagues and friends to meet again in November 2010.

When you support the Winter Clinic, you are also supporting the profession and the community at large. Through the Toronto Academy of Dentistry Endowment Fund, your attendance benefits many organizations, like the Children's Aid Foundation, The Hospital for Sick Children, Kids Help Phone, The March of Dimes, and our two Ontario Dental Faculties.

We would like to thank the Winter Clinic committee, the Academy staff, the ODHA, and the ODAA, for their support.

We look forward to seeing you on November 13th for a day of learning, camaraderie, and fellowship.

Dr Anthony Liscio
Chair, Winter Clinic 2009

Dr. Samer Salama
President,
Toronto Academy of Dentistry

Greetings From...

GREETINGS FROM THE DENTAL INDUSTRY ASSOCIATION OF CANADA (DIAC)

Peter D. Jugoon, President

The past year for DIAC has been a VERY exciting one. We have gone through a Strategic Planning process and refocused our priorities on areas we believe will bring mutual benefit for our members and the Dental profession at large.

Our new vision focuses around four main areas:

1. Leadership involvement
2. Influencing the appropriate people and organizations to move initiatives forward, which we believe will bring a benefit to the entire industry
3. Technology management through a time of rapid progress
4. Education for our members and their staff

These four key areas will be the drivers of the direction DIAC will be going in the coming months and years.

As we head towards the end of 2009, we look back on a year that created a lot of challenges for many people and businesses. At the same time, we see it as a year that also provided many opportunities. We trust that your practices and patients fared well through this challenging time.

As you hold your Toronto Academy of Dentistry's Winter Clinic meeting this year, on behalf of the entire DIAC board, I wish you a very successful meeting and a prosperous 2010!

THE ONTARIO DENTAL ASSISTANTS ASSOCIATION

Darlene Leiska, CDAII
President ODAA

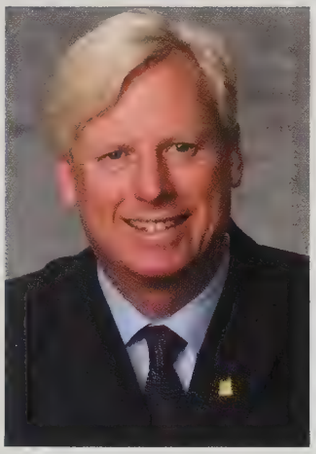
Winter Clinic provides those of us working in dentistry to come together to learn and grow as professionals. 2009 marks the 75th Anniversary of ODAA and one of our key goals is to ensure that our members have access to good continuing education courses. The Toronto Academy of Dentistry is to be commended for the quality of programs that they provide. We look forward to seeing our members at this event and encourage you to come by our booth.

WELCOME FROM THE ONTARIO DENTAL HYGIENISTS' ASSOCIATION

Shelley Newton, RDH, President

I would like to take this opportunity to welcome you to the Toronto Academy of Dentistry's 72nd Annual Winter Clinic. The Academy and its committee have worked tirelessly to bring you a great line up of speakers and sessions.

As regulated health care professionals, dental hygienists value life long learning and continuous quality improvement. Winter Clinic provides the opportunity to meet our quality assurance goals, visit and talk with exhibitors and socialize with colleagues. Please drop by the ODHA booth to say "Hello"!



Mayor
DAVID MILLER

A Message from the Mayor

It gives me great pleasure to extend greetings and a warm welcome to everyone attending the 72nd Annual Winter Clinic, hosted by the Toronto Academy of Dentistry.

This one-day convention offers dentists, dental nurses, hygienists and exhibitors the opportunity to take part in clinical presentations and a trade show. In an industry of evolving technology, the Winter Clinic promotes latest techniques and tools and showcases the most recent advances in the field of dentistry.

This event also provides excellent networking activities and the opportunity to discuss issues and exchange ideas. It is also a time to reconnect with friends and colleagues in a setting designed for professional development.

On behalf of Toronto City Council, I congratulate the Toronto Academy of Dentistry and the exhibitors and sponsors for making this event possible. Please accept my best wishes for an enjoyable and informative day.

Yours truly,

David Miller

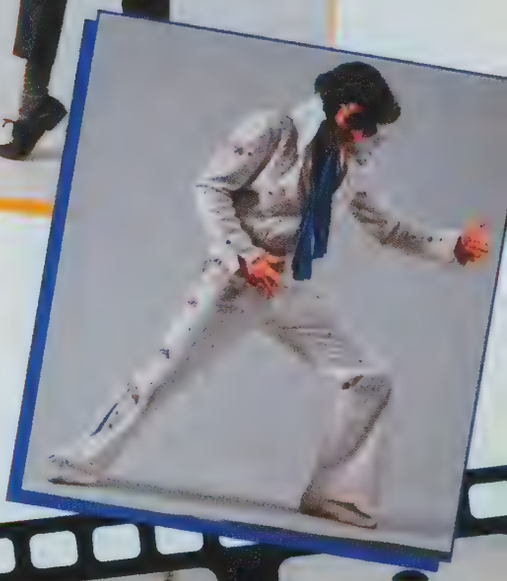
Tribute

featuring THE LEGENDS OF ROCK 'N' ROLL & COUNTRY MUSIC



In a dazzling display of vocalization and costume changes. The "TRIBUTE" show presents a rock & roll illusion... the personalities and the music that have captured the imagination of the world.

The music is 100% danceable yet, in the words of one convention planner, "THE SHOW IS SECOND TO NONE". You can dance to the music or you can watch the show and be highly entertained.

In the past year "TRIBUTE" has played to enthusiastic audiences throughout North America (Vancouver, Indianapolis, Miami, Las Vegas, Atlantic City, Rochester) as well as venues all over Ontario and Quebec.

"TRIBUTE" delivers what you want. The band's versatility allows you to provide your guests with:

1) An evening featuring impersonations of musical stars from the 50's, 60's, 70's, 80's & 90's;

2) A "greaser" night featuring impersonations of some of your favourite stars from the 50's & 60's;

3) A "country" night featuring impersonations of some of country musics greatest stars from the past and present;

Your guests will remember the evening long after the final curtain.

A dazzling light show, top quality sound reproduction, over 20 colourful costume changes and a dynamic stage presentation by truly professional performers all add up to entertainment plus!

Much more than a dance band.

Much more than a show band

WHAT PEOPLE ARE SAYING ABOUT THE "TRIBUTE" SHOW

"You're unbelievable show was the highlight of our Canada Day Celebrations."

DAVID TAVEROFF
DIRECTOR OF COMMUNITY SERVICES
HAMPSTEAD VILLAGE, QUEBEC.

"Thank you for your excellent performance at the OACMHC Annual Conference. Every delegate I spoke with thoroughly enjoyed the performance by you and your troupe of fine young performers"

SUZANNE STAMPER
ASSISTANT DIRECTOR
ONT. ASSOC. OF CHILDREN'S MENTAL HEALTH CENTRES, TORONTO, ONT.

"Because of the amazing performance of your band, our first annual fundraising dance was an overwhelming success... We look forward to working with you next year."

CHRIS CARTER
TEACHERS FOR KIDS
PETERBOROUGH COUNTY BD. OF ED. PETERBOROUGH, ONT.

"It's been three months and people here are still talking about how good your show was... Please book us again for next year."

BEV CLIFFORD
P.V.N.N.R.C.S. SCHOOL BOARD, PETERBOROUGH, ONT.

"All of Petawawa is abuzz with comments about the fabulous show your group put on... Please forward a contract for next year as soon as possible."

CAMPBELL McKIE
DIRECTOR OF RECREATION, PETAWAWA, ONT.

"What can I say? You're show and music is simply the best. We have had some top international stars play our convention in the past and ***no one*** *generated as much excitement and positive response as you and your band... Thank you for an incredible performance."*

JULIE MANSTRANO
ASSISTANT DIRECTOR
CHIDC, VANCOUVER, B.C.

"I really couldn't believe my eyes and ears. Elvis lives! Dolly and Kenny were with us... Michael Jackson and Roy Orbison took the stage at our annual convention. Keith, you and your band made us believe and blew us all away. Your impersonations were fantastic and I, for one, never stopped dancing. Thanks Again."

DOUG CURR
ONT. FIRECHIEFS CONVENTIONS, MARKHAM, ONT.

"Your show was better than any of us could've imagined... it was the best entertainment ever seen in Tavistock."

DR. PAUL BARTLETT
PRESIDENT, TAVISTOCK BRAVES HOCKEY CLUB.

As well as songs from the artists listed on the cover, "Tribute" also performs the following material:

Invisalign® Clear Essentials

One-day Limited Attendance Program in conjunction with Winter Clinic

INITIATIVE

Invisalign® is an esthetic orthodontic technique that corrects malocclusion using a series of custom-made, nearly invisible, removable aligners. University-based and private clinical studies have proven its effectiveness, attracting dentists nationwide to integrate the Invisalign® method into their specialty and family practices. Invisalign® Clear Essentials is the educational opportunity that allows them to achieve this goal successfully.

Dental schools throughout the US and Canada have successfully integrated Invisalign® into their curricula, with the technique currently taught in 38 Orthodontic programs and 11 pre-doctoral programs. Many professional organizations and societies also offer their members the Invisalign® Clear Essentials I course. In 2008, 27 national and state organizations, as well as The Dawson Center and The Scottsdale Center, offered Invisalign® Clear Essentials as an educational opportunity to their members. These courses are presented by faculty on Align Technology's Speaker's Bureau, which includes clinical experts in the method and renowned lecturers in the dental community.

The following pages outline the integration of Invisalign® Clear Essentials into a meeting, illustrating the benefits for both the organization and its members of offering this course.

TONY GADBOIS, DDS

Friday, November 13, 2009

Room: 701B
Time: 8:00 am - 12:00 pm
1:30 pm - 5:00 pm

INVISALIGN: CLEAR ESSENTIALS I

PROGRAM DESCRIPTION

This one day course is designed specifically for the general practitioner and team members that wish to incorporate the Invisalign® system into their practice. This case based training provides participants with the clinical and operational confidence to successfully treat a range of highly predictable cases.

In addition to providing your entire team with essential clinical, operational and marketing skills, the course presents a full range of support resources specifically designed to meet the needs of the non orthodontic practice. Tuition covers the doctor and up to 4 team members for the full-day course.

EDUCATIONAL OBJECTIVES

- Understand the necessary steps of the Invisalign system including
- Case selection and treatment goal planning
- Case submission
- Treatment planning process
- Treatment initiation
- Case Monitoring
- Finishing and Retention
- Describe available support tools to assist with the Invisalign system
- Select more predictable cases for treatment based on relevant clinical experience
- Gain the necessary knowledge to integrate the Invisalign system into their practice immediately.

**This program is sponsored by Align Technology, manufacturer of Invisalign products. Clinical presenters may receive an honorarium and may hold stock in Align Technology.*

Toronto Academy of Dentistry

Invisalign® Clear Essentials

One-day Limited Attendance Program in conjunction with Winter Clinic

CARLYN PHUCAS, DDS
Friday, November 13, 2009
Room: 706
Time: 8:00 am - 12:00 pm
1:30 pm - 5:00 pm

INVISALIGN: CLEAR ESSENTIALS II

PROGRAM DESCRIPTION

A lecture and workshop designed for GPs who currently offer Invisalign in their practice. Advanced topics and techniques using Invisalign are discussed to help doctors effectively select and treat more complex malocclusions. We recommend that participants have experience submitting and finishing Invisalign cases prior to attending Invisalign: Clear Essentials II. Attendees must be Invisalign trained.

Doctors are encouraged to bring cases to Invisalign: Clear Essentials II – the orthodontic instructor will select some cases to discuss during part of the course and be available for Q&A after the course.

Topics presented include:

- How to identify and treat cases with Invisalign
- Advanced Invisalign diagnosis and treatment planning
- Advanced Invisalign techniques including buttons, elastics, pliers and IPR
- Tips & techniques from the experienced Invisalign providers
- How to use the full range of clinical support mechanisms

COURSE SCHEDULE

One-day course offers 7 CE credits.
For Doctors only.
For current Invisalign providers only.

General Session

Provides practitioners the foundation of diagnosis, treatment planning, treatment initiation, monitoring, and finishing Full Cases utilizing the Invisalign technique. The day concludes with a hands-on session with cases brought in by attendees.

Topics covered include:

- Case Applicability
- ClinCheck Review
- Attachments
- IPR
- Adjunctive Techniques
- Live Case Review

**This program is fully sponsored by Align Technology, manufacturer of Invisalign products. Clinical presenters may receive an honorarium and may hold stock in Align Technology. .*

THE MILITARY PROGRAMS
PRESENTED BY THE CANADIAN FORCES

8:45 a.m. – 9:15 a.m.
Room 705
Chair: **Dr. Paul Chapnick**

Capt. Mehmet Danis, DDS
Canadian Forces Dental Unit, Toronto

9:15 a.m. – 11:15 a.m.
Room 705
Chair: **Dr. Paul Chapnick**

Major Antonella Trache, DDS
Canadian Forces, Atlantic Region

Please be Unreasonable! – Pushing yourself beyond the limits of your own imagination and the expectations of society

About the Speaker

Following receiving a Masters of Cell and Molecular Biology from the University of Toronto in 2001 , Mehmet completed his DDS at the University of Western Ontario. He is the recipient of numerous scholarship awards and the Canadian Forces Leadership Division Top Athlete Award, awarded to the athlete with highest ranking in the CF express fitness test. He was the 2009 winner of the Atacama Crossing Race (by a margin of over 50 minutes), ranked by TIME magazine as one of the 10 most grueling races of the world in which over 20 nations and 85 competitors took part. Just prior to Winter Clinic, Mehmet will be competing in the 250 km Sahara Race. In addition to his duties with the Canadian Forces, Mehmet is a motivational speaker and a trail running clinic instructor.

About the Program

Have you lost track of what really makes you happy? Are you aware that some of the most gratifying moments in your life are preceded by moments of uncertainty, stress and discomfort? All too often reason preys on our dreams, our imagination, and sometimes even our human development. It limits us, ties us down while keeping us comfortable and safe. Reason can be a tricky thing. Not only will Capt. Mehmet's journey bring a child like smile to your face, but it will bring a positive change to your life, and as it has for many, ignite a spontaneous curiosity towards charity, kindness and humanity.

Who Should Attend this Program

If you are part of the comfort culture, obsessed with convenience, ease and technology, please join us and let Capt. Mehmet Danis bring happy smiles to your face and warm feelings to your heart.

Afghanistan, as Seen Through the Eyes of an Oral and Maxillofacial Surgeon

About the Speaker

Dr. Trache graduated from the University of Alberta, Faculty of Medicine and Dentistry in 1993. She joined the Canadian Forces in 1990, and upon graduation she was posted to CFB Edmonton where she provided dental services to members of the Canadian Forces. In 1998, she left the military for civilian private practice, only to return 2 years later. Dr. Trache was posted to 19 Wing Comox, BC prior to being selected for training as an Oral and Maxillofacial Surgeon. She completed her post-graduate residency training at University of Texas, Houston from 2004 to 2008. In the summer of 2008, Dr. Trache was posted to CFB Halifax where she is currently the Atlantic Region Oral and Maxillofacial Surgeon.

Dr. Trache is a regular force member and has served in the Canadian Forces for 17 years. She is the first female Oral and Maxillofacial Surgeon in the Canadian Forces. She has recently completed a 3-month tour as the Oral and Maxillofacial Surgeon of the Role 3 Multi-National Medical Unit at Kandahar Air Field, from April to July 2009.

About the Program

This presentation brings you as close to the current conflict in Afghanistan as possible without placing you in harm's way. By attending this presentation one can expect to gain insight and current knowledge regarding the war within Afghanistan. The Afghanistan culture and the military mission will be highlighted. The medical and dental facilities, types of injuries and maxillofacial trauma associated with this conflict will be reviewed. Several concepts regarding face, head and neck trauma will be outlined through actual case presentations. Please be aware that this presentation contains graphic images of battle injuries, combat operations and invasive surgical procedures that some people may find disturbing.

What you will learn

- Afghanistan culture and demographics
- Greater understanding of the military mission in Afghanistan
- How medical and dental services are delivered to civilians and military personnel serving in Afghanistan
- Current concepts regarding initial management and treatment for penetrating trauma to the face, head and neck
- future outlook for Afghanistan.

Who Should Attend this Program

Dr. Trache is pleased to be able to share her recent personal experience and insights regarding her deployment to Afghanistan to all members of the dental team.

Clinicians at the 72nd Annual Winter Clinic

Janice Mahood
Toronto, Ontario

8:45 a.m. – 11:30 a.m.
Room 713A & B
Chair: **Darlene Leiska, CDA II**

Skillpath Seminars

The Conference for Women – Get your life on track

About the Speaker

Janice Mahood is one of America's top authorities on communication and leadership. She walks the talk—both in her career and at the podium—and audiences vigorously respond. Her dynamic and energetic delivery creates a spark of electricity that ignites the room. Powerfully and positively impacting the lives of thousands of people each year, Janice speaks from 20 years of experience in training and management. She has recruited, trained and managed sales representatives, maintained high-level national account contacts and developed exceptional customer service standards for clients. Janice realizes if she only "speaks" to a group, the members will retain little. Instead, she harnesses her rock-solid background, unique training style and well-placed humor to capture her audience's rapt attention and instill in them the keys to lasting change and success.

About the Program

In planning this event, we shaped the agenda around the top concerns professional women face today. Each of the highly focused modules is filled with practical advice, life lessons and teaching points that will be invaluable as you press toward the reality of achieving your dreams. You'll uncover the keys to writing and speaking with confidence and authority, cultivating your untapped potential to lead, standing your ground and positively resolving conflicts. And that's just for starters—you'll learn many more skills that will immediately make you a more valuable member of your team.

What You Will Learn

How to keep difficult people from ruining your day

- You can express anger in healthy, constructive ways—this can actually help resolve the conflict
- Great insight into mending relationships you thought were permanently damaged
- How to manage the anxiety that comes with difficult encounters

Keep your emotions from running the show

- How to loosen up and overcome your "fear of foolishness"
- Exercise your humor muscle! Learn how to use levity to cope with problems and make yourself feel good
- What to do when you're upset and you know you're going to cry

Presenting yourself as a woman who's going places

- Why your personal appearance plays an important role in whether you're taken seriously at what you do
- How to foster an appearance that shows you're in command, yet approachable
- How to keep from sabotaging your own success

Are you guilty of these credibility busters?

- Learn which mannerisms, gestures and speech habits you should avoid at all costs
- How to project an image of self-confidence and assertiveness without seeming "pushy"

Who should attend this programme

Any professional woman interested in learning how to boost her career, overcome personal and professional challenges, and manage and enhance life will love this programme! Learn from the best!

1:30 p.m. – 3:30 p.m.
Room 713A & B
Chair: **Susan Stokes, CDA11**

Skillpath Seminars

The Essentials of Communicating with Diplomacy and Professionalism

About the Program

"Why didn't I think of saying that at the time?" Unfortunately, we all know what it's like to have the perfect response pop into our heads after an important situation or verbal exchange—too late to be of any use. Yet there are those individuals who always seem to know exactly what to do—and say—in any conflict or crisis. Faced with an unhappy patient, an uncooperative co-worker or a tense negotiation, they don't stammer, stumble or get upset—they keep their cool and smoothly sail through the encounter, getting what they want without breaking a sweat. And, not surprisingly, the professional who demonstrates that kind of powerful poise and presence is also the person who rapidly rises through the ranks. Fortunately, great communicators are made, not born—it's a matter of having the right tools and knowledge. However, most of those inspiring individuals have gotten there the hard way, learning these valuable skills and techniques through trial and error, painstakingly developing them over many years and making countless mistakes along the way. *Until now.* This programme, given by a seasoned pro, will teach you the most crucial, practical information that you can begin using immediately.

What You Will Learn

- Where do most problems come from?
- How being unconditionally constructive is the key to your success
- The 5 most powerful words in the English language
- All we want is a little respect… ways to encourage this all-important practice
- Sure-fire ways to prevent or reduce defensive behavior
- The 4 types of questions… how to know which to use to get the information you need
- Handling other people's conflicts without getting caught in the crossfire
- Putting it on paper—writing skills that will see you through touchy situations
- The do's and don'ts of documentation… these guidelines could save your hide!
- When things get out of hand—techniques for defusing tense or explosive situations
- Getting to win/win solutions—there's no reason to have any "losers"

Who should attend this programme

Every member of dental team will find this programme of invaluable assistance and enable them to deal with the most difficult and high pressure situations with finesse and comfort.

Of Interest to: Dentists, Dental Hygienists, Clinical Assistants, Administrative Assistants, Dental Technologists

Clinicians at the 72nd Annual Winter Clinic

Ernest Lam, DDS
Toronto, Ontario

9:00 a.m. – 11:30 a.m.
Room 711
Chair: **Dr. Bonnie Chandler**

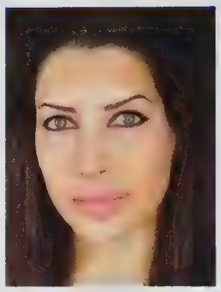
Imaging Strategies in Oral and Maxillofacial Radiology

About the Speaker
Since 1995, Dr. Ernest Lam has been an Associate Professor in the Discipline of Oral and Maxillofacial Radiology in the Faculty of Dentistry at the University of Toronto and presently serves as Chair of the Department. Dr. Lam completed the combined DMD/MSc program at the University of British Columbia in Vancouver. After 2 years in general dentistry, Dr. Lam undertook specialty training in Oral and Maxillofacial Radiology at the University of Iowa's College of Dentistry, and completed a PhD in the Radiation Biology Graduate Program at that University's College of Medicine. Dr. Lam is a Fellow of the Royal College of Dentists in Oral and Maxillofacial Radiology and a Diplomate of the American Board of Oral and Maxillofacial Radiology. In addition to his academic responsibilities, Dr. Lam maintains part-time private practices in oral and maxillofacial radiology in Toronto and Edmonton

About the Program
With the recent explosion of new technologies in oral and maxillofacial radiology, it may at times be difficult for the clinician to decide how best to investigate jaw abnormalities that arise in their patients. Using a case-based format, this session will survey projection intra- and extra-oral radiography, spiral and cone beam computed tomography, magnetic resonance imaging and nuclear medicine, and illustrate how one or more of these may be used selectively in the diagnosis of lesions that arise in the jaws.

What you will learn
- To develop an understanding of the underlying principles of advanced imaging modalities.
- To recognize the unique role that individual imaging modalities play in the diagnosis of jaw lesions.

Who Should Attend this Programme
This interactive programme is geared for all practitioners engaged in the practice of dentistry wishing to update their knowledge and skill in diagnostic imaging.



Sara Solomon , DDS
Toronto, Ontario

1:30 p.m. – 3:30 p.m.
Room 717B
Chair: **Dr. Sheldon Cooper**

Dentistry Shouldn't be a Pain in the Neck… or Back

About the Speaker
Dr. Sara Solomon received her BSc in Physical Therapy and her DMD from McGill University in 2001 and 2005 respectively. She is a general dentist in private practice in Toronto, Ontario. Dr. Solomon is also a certified personal trainer and a SPINNING® instructor at Totum Life Science in downtown Toronto. She lectures to dental professionals on the prevention and treatment of work-related musculoskeletal injuries.

About the Program
The delivery of dental care is extremely demanding on the body. In fact, more than half of all practicing dental professionals will experience work-related pain. This evidence-based lecture focuses on the prevention and treatment of dentistry-related musculoskeletal injuries of the lower back, neck, shoulder, wrist and hand. This presentation covers the theoretical aspects of musculoskeletal injuries, with emphasis on prevention via proper posture and fitness as well as the prevention of chronic pain via implementation of dento-ergonomics. Attendees will learn correct selection and positioning of operator, patient, and assistant chairs. Guidelines on operatory layout, overhead light positioning, delivery-system designs, ergonomic instruments and surgical telescopes will be discussed in-depth. Participants will leave this session with tips and tricks that will have an immediate positive impact on the way they practice dentistry.

What you will learn
- Prevalence, etiology, and consequences of dentistry-related musculoskeletal pain.
- Signs and symptoms of musculoskeletal disorders commonly encountered by those engaged in the practice of dentistry.
- Techniques to minimize risk factors associated with musculoskeletal pain, with emphasis on proper posture and body mechanics in the operatory
- Exercises to alleviate pain and prevent musculoskeletal dysfunction:

Who should attend this programme
This programme is of vital interest to all dentists, hygienists and chairside assistants who wish to learn to practice comfortably throughout the day and prevent long term injury that might shorten ones career.

Clinicians at the 72nd Annual Winter Clinic

8:45 a.m. – 11:30 a.m.
Room 718B
Chair: **Dr. Sheryl Lipton**

Posterior Composite Resins in 2009

John C. McManama, DDS
Boston University, Goldman School of Dental Medicine

About the Speaker
Dr. John McManama is a professor in the Department of General Dentistry at Boston University, Goldman School of Dental Medicine where he has received numerous awards and honors. He is the Director of Programs and Courses at every level of the dental school and also served as Chairman of the Department of Operative Dentistry. He is a highly regarded international speaker having presented numerous programs around the world on all areas of restorative dentistry with an emphasis on conservative adhesive dentistry. Dr. McNanama also maintains a general practice with the Restorative Dental Group of Cambridge.

About the Program
This course is intended to take a critical look at posterior resin based composite restorations in 2009. The discussion will clarify and answer your questions regarding the present use of composite resin and address the issue of whether it has evolved to the point where composite resin is really ready to replace amalgam and what the future holds.

You will learn
- Diagnose and treat incipient lesions
- Isolation techniques
- Minimally invasive preparation design
- Deep lesions and pulp capping
- Adhesive systems
- Matrix systems
- Flowable resins
- Placement and curing techniques
- Finishing and polishing
- Treatment planning – when not to use composite resin

Who should attend this program
Composite resins should only be considered when you know that you can predictably do them well. An understanding of material properties, technique and a recognition of its limitations is required. This program will be highly regarded by all restorative dentists, restorative dental hygienists and clinical assistants.

1:30 p.m. - 3:30 p.m.
Room 718B
Chair: **Dr. Mike Bulger**

Technique Technique Technique

About the Program
As restorative materials continue to evolve, how can we practice evidence based dentistry when there doesn't seem to be a lot of evidence out there? This course will focus on two issues: selecting the best materials and using them properly.

You will learn
- How do PFM crowns, zirconium and pressed ceramics compare to cast gold?
- Restoration of endodontically treated teeth – when and how to use posts
- Ceramic inlays and onlays – indications and techniques
- Veneers – ultra thin vs conventional
- Retraction and Impression techniques
- Luting agents and cementation techniques
- Bite registrations
- Post restorative sensitivity and its prevention
- Treating deep carious lesions
- Cervical sensitivity and how to treat it

Who should attend this program
Recommending and providing care to our patients requires a solid understanding of the multitude of materials and techniques that continue to evolve. All dentists, restorative dental hygienists and clinical assistants engaged in the restoration of teeth will find this program thought provoking and engaging .

Clinicians at the 72nd Annual Winter Clinic

UNIVERSITY OF TORONTO
FACULTY OF DENTISTRY

UPDATE IN DENTISTRY
PRESENTED BY THE UNIVERSITY OF TORONTO FACULTY OF DENTISTRY

This annual review is for the first time being presented at Winter Clinic. The goal of this program is to provide members of the profession insight as to what is new and what might be on the horizon in clinical dentistry in topics that have direct impact on dental practice. Each presentation will be 25 minutes in length followed by a 5 minute question and answer period.

Moderator

Robert Carroll, DDS
Assistant Dean, Continuing Dental Education and Professional Development, University of Toronto

8:45 a.m. - 11:30 a.m.
1:30 p.m. - 3:30 p.m.
Room 701A
Chair: **Dr. Paul Okorofsky**

Speakers

Fatima Jadu, BDS, MSc
Division of Oral and Maxillofacial Radiology

8:45 a.m.

A new application of cone beam CT: Imaging of the major salivary gland

Traditionally, sialography has been combined with plain radiographs; more recently, it has been combined with CT and MRI. But all these imaging modalities have limitations that can be overcome by the new technology of cone beam CT.

Omar El-Mowafy, BDS
Professor in Restorative Dentistry, Department of Clinical Sciences

9:15 a.m.

Mechanical fatigue-resistance of non-metallic molar crowns

CAD-CAM generated crowns are gaining popularity for many reasons. Among them is that the chair-side equipment that is used for their fabrication have become much more user-friendly and more affordable than before. These crowns can be made with a variety of porcelain blocks or alternatively using resin composite blocks. New research findings of mechanical fatigue-resistance of CAD-CAM molar crowns made with the two materials will be presented and discussed.

Rita Bower
Digital Media Specialist, University of Toronto

9:45 a.m.

What's New in Dental Photography

This program will discuss must have gadgets and equipment that will simplify your patient's photographic documentation.

Peter McDermott, DDS
Assistant Professor, Discipline of Prosthodontics

10:15 a.m.

Colour Science and Technology for Tooth Shade Selection

Clinicians at the 72nd Annual Winter Clinic

UNIVERSITY OF TORONTO
FACULTY OF DENTISTRY

UPDATE IN DENTISTRY
PRESENTED BY THE UNIVERSITY OF TORONTO FACULTY OF DENTISTRY

Speakers

Bettina Basrani, DDS
Assistant Professor and Program Co-Director M.Sc. Endodontics Program

10:45 a.m.

Irrigants and Medicaments in Endodontics

The aim of root canal treatment is to eliminate microorganisms from the infected root canal and to prevent reinfection. The update of medications and delivery systems will be discussed during this presentation as well as the controversies between one vs. multiple appointments.

Ted Fillery
Head of the Oral Microbiology Section, Faculty of Dentistry, University of Toronto

11:15 a.m.

Mutuum auxilium: The RCDSO and Infection Control

This presentation will provide commentary on the proposed RCDSO Infection Control guidelines from the perspective of a 30 year career in Oral Microbiology.

Marshall M. Freilich, DDS
Associate in Dentistry, Faculty of Dentistry, University of Toronto

1:30 p.m.

Advances in Oral and Maxillofacial Surgery: Computer Guided Implant Surgery

While the paradigm "prosthetically driven implant therapy" is widely accepted and promoted, achieving this objective can be elusive with the application of conventional technologies. Utilizing cone-beam CT imaging, the application of computer guidance systems provides symbiosis between the surgical diagnosis, prosthetic treatment plan, bone graft surgery and surgical implant placement, and can ensure that the surgical reconstruction provides the restoring dentist with the most desirable foundation to support the intended prosthesis.

Jim Yuan Lai, DMD
Assistant Professor and Head of Periodontology University of Toronto, Faculty of Dentistry

2:00 p.m.

Periodontal Risk Assessment

Periodontal Risk assessment is specifically focused on considering factors that may affect future progression or onset of periodontitis. The ability to predict if a patient has a high risk of developing periodontitis will aid in the clinical decision-making.

Hashim Nainar, DDS
Associate Professor in Pediatric Dentistry

2:30 p.m.

Infant Oral Health: Rationale for an early dental visit

Carilynne Yarascavitch, DDS
Dental Anaesthesia

3:00 p.m.

The NEW RCDSO Sedation Guidelines – Minimal, Moderate, or Deep?

This presentation will provide a synopsis of the 2009 revised RCDSO Sedation Guidelines and will be a practical distillation of the guidelines with information to facilitate the incorporation of sedation into dental patient care. Although all sedation modalities will be addressed, the focus of this presentation will be describing the required equipment and training to carry out the types of sedation most used by general practitioners (minimal and moderate conscious sedation) in accordance with these newly revised regulations.

An Update On Nickel-Titanium Rotary Instruments

About the Speaker

Dr. Peters received his degree in dentistry (Dr. med dent) from the University of Kiel, Germany, in 1990. After spending two years in the Department of Neurophysiology at the University of Kiel, he served as an assistant professor of prosthodontics at the University of Heidelberg, Germany, from 1993 to 1996. He received postgraduate endodontic training as a PhD (Dr. habil.) at Zurich University Dental School from 1997 to 2001. He was an associate professor and head of the faculty practice in restorative dentistry at the University of Zurich from 1996 to 2001, spending his time teaching, giving CE courses and participating in the faculty practice. Dr. Peters attended UC San Francisco from 2001 to 2003 and received an MS certificate in Oral Biology. He also received a certificate in endodontics from UCSF in 2006 and the dental license in California in 2007. He is currently Professor and Director of Endodontic Research in the Endodontic Department of the Arthur A Dugoni School of Dentistry at the University of the Pacific, San Francisco and maintains a private practice in San Francisco. Dr. Peters has published more than 100 papers, abstracts and book chapters and has lectured both nationally and internationally; he serves on the review panel and editorial boards of most endodontic journals.

About the program

Nickel-titanium instruments for rotary root canal preparation have been around for more than 15 years. They are felt to give general practitioners the tools to superior endodontic outcomes. Obviously, the significant market volume in terms of US-$$ generates ongoing product cycles that may and may not result in clinical advancement or better outcomes. This lecture aims at giving an update on recent developments in Nickel-titanium metallurgy and manufacturing, discussing marketing claims in the light of well-founded facts. Over the last year or two, new technologies such as electropolishing, new alloys (M-wire) and manufacturing technologies ("twisting a file") have been highlighted and it has been claimed that those techniques will reduce file fatigue and hence instrument fractures. These developments are fairly recent and not much scientific evidence is available for any of those assertions. However, it is important to keep abreast of current technologies as they emerge; this presentation will not only explain the detailed nature of the terms but also make and attempt to investigate manufacturers' claims.

At conclusion of the meeting, participants will be able to:

- Describe the properties of latest-generation Nickel-titanium rotary instruments
- Point towards key experiments that prove or disprove manufacturers' claims
- Assess the potential for changes in clinical outcomes with various Nickel-titanium instruments

Who should attend this program?

This presentation is geared towards general practitioners actively engaged in endodontic treatment in daily practice.

David Cravits
Toronto, Ontario

10:00 a.m. – 11:00 a.m.
Room 716B
Chair: **Dr. Tim Miligan**

The Patient as Consumer: How the Baby Boomers are Re-Shaping our Health Care System

About the Speaker

David Cravit has over 30 years' experience in advertising, marketing and consulting in both Canada and the USA. He was a partner in Saffer Cravit & Freedman Advertising, which he helped take from start-up to over $150 million in annual billings. The agency was recognized as the leading retail specialist agency in North America. After selling his interest in the business, Cravit worked as an independent consultant and also a consultant to other advertising agencies in Canada and the USA, before joining ZoomerMedia in November, 2005 for which he holds the position of Vice President. Over the years, Cravit has participated at the most senior levels in the creation and placement of over $5 billion worth of media advertising. He has been a frequent speaker at corporate and industry events, guest on numerous radio and TV shows, and contributor to professional journals. His book, "The New Old," (October, 2008, ECW Press) details how Zoomers (led by the Baby Boomers) are completely reinventing the process of aging – and the implications for companies, government, and society as a whole.

About the Program

Mr. Cravit will enlighten you with the phenomenom of BoomerAging, the transformation of seniors into "Zoomers", a fascinating story of the Baby Boomer generation refusing to age in the traditional way, and offer a predictive window of how this generation will create a revolution in everything from health, to finance, to travel and fashion. Mr. Cravit will give everyone much to think about, and will suggest how policy makers, professionals, researchers, marketers, educators and everyone else for that matter, must recognize the immense impact that this group will play and hence formulate strategies to capitalize on this powerful segment of society.

Who should attend this program

Within a few years the topic of Boomers and BoomerAging will become the issue for almost everyone. All those in business and policy making will have to adjust and take Boomers into account. This program is for absolutely everyone interested in expanding their horizons and discovering what the new norms may become.

How do I Know when it is OK to Try a Procedure for the First Time?

Randi Zlotnik Shaul, LLM, Phd.
Toronto, Ontario

About the Speaker
Dr. Randi Zlotnik Shaul is a bioethicist at The Hospital for Sick Children in Toronto. In that role she provides ethics consultation services and policy support to individuals and committees within the hospital, teaches health care professionals and bioethics students, and conducts bioethics research. Randi is an assistant professor in the Department of Paediatrics at the University of Toronto, has an appointment in the Department of Surgery and is a member of the University of Toronto's Joint Centre for Bioethics. Randi has a degree in political science from McGill University, a law degree from Osgoode Hall, and both a Master of Law degree and a Ph.D. in bioethics from the University of Toronto. Before graduate school, Randi practiced law at the Ontario Ministry of Health. She has published in the areas of health law, priority setting, accountability and research ethics. Randi has presented at conferences both nationally and internationally. She has been an active member of The Hospital for Sick Children's Research Ethics Board for almost 9 years. Randi's current research interests include the interface of law and ethics in clinical and research based accountability and the introduction of innovative therapies in health care institutions. She is currently a PI on a CIHR funded grant looking at issues of dual accountability for clinician-researchers.

About the Program
Just learned a new procedure or purchased a new piece of equipment with new technology? Are you ready to try it out? Stop!!! Be sure you are on sound ground and consider the material to be discussed in this program before you jump in. This session will address the law and ethics related to the topics of performing innovative procedures and standards for informed consent in Ontario.

Participants can expect to:
- understand when it is legally and ethically defensible to try a procedure for the first time
- be able to develop an innovation guideline for their own practices
- Understand the legal and ethical standards for valid informed consents

Who should attend this program?
If you are like most practioners you like to keep up to date, learn new techniques and utilize new technology. Before you try something for the first time, wise clinicians will consider the topics addressed in this timely presentation.

1:30 p.m. - 3:30 p.m.
Room 716A
Chair: **Dr. Phil Novak**

Challenging Anterior Implant Cases – How to keep it simple!

Howard Klaiman, DDS
Toronto, Ontario

About the Speaker
Dr. Klaiman graduated from the University of Toronto's Faculty of Dentistry in 1985 and received his Certificate of Advance Graduate Studies in Prosthodontics from the Goldman School of Graduate Dentistry, Boston University. Dr. Klaiman has a part-time teaching appointment at the University of Toronto where he serves as a clinical instructor for the Department of Prosthodontics. He has also held executive positions for the Ontario Association of Dental Specialists, Ontario Study Club of Osseointegration, Toronto Dental Seminars, and The Association of Prosthodontics of Ontario. Dr. Klaiman maintains a full time specialty practice in fixed and removeable prosthodontics in Toronto.

About the Program
The placement of dental implants is now in common use in a restorative/prosthodontic practice. In many instances the replacement of questionable teeth with dental implants is the state of the art for many patients. The anterior zone of the oral cavity requires optimum diagnosing and treatment planning particularly for patients with a high smile line. This presentation will present a concise review of the literature to show the evidence to support this topic.

What you will learn
- exacting tissue management
- aesthetic modifications during healing through to the final prosthetic placement
- cemented versus screw-retained prosthetics

Who Should Attend this Program
This program is geared to dentists engaged in treatment planning, placement and restoration of dental implants.

Ethics in Scientific Reporting and Publishing in Dentistry

About the Speaker

Dr. Ellen is a professor at both the University of Toronto Faculty of Dentistry and Faculty of Medicine. He has published extensively and has received numerous awards for his work. He teaches at both the graduate and undergraduate level and is currently involved in several research studies as well as serving on the editorial board of the Journal of Periodontology

Dr. John O'Keefe is the Editor in Chief of the Journal the Canadian Dental Association and has held this position since 1997. During this time he has also conducted a clinical practice on a part-time basis, been Chairman of the FDI Communications & Member Support Committee, and been President of the American Association of Dental Editors.

Mr. Fefergrad is Registrar, Chief Executive Officer and in-house legal counsel for the Royal College of Dental Surgeons of Ontario. He has the distinction of being the first lawyer in the history of the Law Society of Upper Canada to achieve a double specialty in civil litigation and in health law, and the first lawyer to achieve a specialty in the practice of health law. Mr. Fefergrad is also an educator, author and teacher. He is an Adjunct Professor at the University of Western Ontario, Schulich School of Medicine and Dentistry, and Assistant Professor at the University of Toronto, Faculty of Dentistry. Mr. Fefergrad is one of the founding directors of the Canadian Regulatory Authorities Federation. He is in much demand provincially and nationally as a guest lecturer in the area of health law and associated issues

Dr. Torneck, is Professor Emeritus at the University of Toronto, Faculty of Dentistry, where he held the position of Chair of the Department of Endodontics and Co-chair of the Post-graduate Department of Endodontics. He continues to teach part-time in the graduate endodontic program at the University of Toronto and Nova Southeastern University. He has served as a consultant and senior staff member to the dental divisions at Mt. Sinai Hospital and the Hospital for Sick Children in Toronto, has authored many scientific papers, and contributed chapters to 19 textbooks related to dental practice and dental science. Dr. Torneck has also served as an editorial consultant to several national and international scientific journals , lectured internationally and has served as President of numerous national and international associations including the American Board of Endodontics. Dr. Torneck is the recipient of many awards in recognition of his contributions to the profession and society.

About the Program

Never before has information been disseminated as widely and as rapidly as it is today. This is particularly true of scientific information. This places a special onus on those who develop the science, publish the science, and are influenced by the science, to ensure that the information disseminated, is factually correct and free of bias. This panel will delve into the responsibility of those engaged in scientific experimentation, in this case, experimentation in dental science, to prominently disclose the source of all funding and to report their results fully and truthfully. Next it will define the responsibility of the editor to ensure that the science is original and that each paper is reviewed for content by a panel of conscientious and knowledgeable experts, and to ensure that issues of concern raised by an expert, is properly addressed by the author(s) prior to the time of publication. Steps taken to ensure honesty and transparency on the part of the editor to avoid bias in the selection of authors and papers for publication will also be considered. Finally, the role of the profession in protecting the public from scientific misinformation will be highlighted, in particular the responsibility of the profession to recognize and identify misinformation when it occurs. Associated with this is the recourse available to the public when all the level of protection fails

Each panelist will make a 20 minute presentation followed by their participation in 30 minutes of open dialogue with the attendees.

What you will learn

- Know what constitutes a sound scientific report
- Understand the hierarchy of scientific information
- Discern how scientific papers are reviewed and critiqued
- Know why editors separate scientific papers from clinical and narrative reports.
- Recognize the responsibility of the profession to understand what constitutes good research in order to properly guide their patients.
- Know avenues of recourse available to the public adversely affected by misinformation.

Who should attend this program

All those who offer advice and render treatment must understand the literature that supports their recommendations. This distinguished panel will offer sound principles to aid the practitioner in selecting and evaluating the sources of information that is the basis of the advice and treatment that our patients receive.

Toronto, Ontario

Who's Minding Your Money? Finding Good Investment Advice — For Better Results

9:00 a.m. – 11:30 a.m.
Room 709
Chair: **Dr. Shervin Abbaszadeh**

About the Speaker

Ron is the senior investment planning advisor with CDSPI Advisory Services. His role at CDSPI is to provide clients with comprehensive financial planning integrating both personal and corporate assets into a custom tailored investment and estate plan. Ron has practiced in the financial services industry for over 16 years. His exclusive practice of dealing with dentists provides him with the expertise in providing financial solutions specific to the needs of the dental professional. He has extensive experience as a financial planner, stockbroker as well as both domestic and offshore private banking. He has taught as a professor and has lectured at universities and trade conferences around Canada.

About the Program

In a time of turbulent markets, getting good investment advice is more important than ever. But finding good advice isn't always easy — as highlighted by recent media stories about investors devastated by their problematic advisors. This presentation outlines traits that good investment companies and advisors have in common — such as trustworthiness and knowledge — and ways to recognize them (for example, through understanding industry recognized qualifications and sales fee bias). You'll also learn how to measure whether you are being served well on a continuing basis, so good advice can translate into better results

What you will learn

- Traits good investment companies and advisers have in common
- Understanding industry recognized qualifications
- Recognizing sales bias
- Long term service……how do you evaluate your adviser?

WHO SHOULD ATTEND:

This programme will be of interest to all those interested in learning where to look for sound financial advice and what criteria to consider in making choices on selection of a financial adviser.

Dam-It, It's Easy! – Basic Programme

About the Speaker

Mary R. Costello, CDA, has a BS in Health Administration from Governors State University, Illinois. She has over 40 years experience in the dental field, serving as Expanded Duties Dental Auxiliary for the US Army, a Dental Coordinator for a hospital-based dental center, and a Dental Dam Instructor, lecturing throughout the United States and Canada on Dental Dam Dentistry. Mary is currently Manager of Continuing Education and Professional Relations-Hygenic Products for Coltene/Whaledent, Inc.

About the Program

This fast-paced seminar combines a multimedia presentation with Hands-On participation featuring simplified dental dam application techniques that expedite dental dam placement. Participants will learn to apply dam for the following procedures:

* Endodontic Therapy
* Restorative Dentistry (Posterior teeth)
* Composite-Bonding (Anterior teeth).

You will learn

- Clampless Technique-An alternative to using clamps
- Simple guidelines for clamp/retainer selection
- Winged Technique-A combined-step method
- Modified Winged Technique-The wingless alternative
- Loop Technique-A method to expedite dam placement through tight contacts
- helpful hints and suggestions for dam usage involving interproximal restorations, structurally compromised teeth, and fixed bridges

Who should attend this program

This program will provide invaluable assistance to all clinical members of the dental team engaged in restorative and endodontic treatment.

Note: This is a hands on program. To reserve a seat for participation in this program an advance deposit of $50 is required which will be returned to you upon completion of the course.

1:30 p.m. – 3:30 p.m.
Room 707
Chair: **Terri Morris, RDH**

Dam-It, It's Easy! – Advanced Programme

About the Program

This three hour hands-on seminar is intended for those who possess basic dental dam applications skills and wish to expand their usage of dam for more complicated isolations. The program presents a brief review of simplified application techniques that expedite dam placement. In addition, participants apply dental dam to typodonts utilizing some of the advanced techniques discussed in the program.

You will learn

- Review of Simplified Techniques -winged technique ,clamp/retainer selection
- Clinical suggestions for using dam with interproximal restorations
- Guidelines to prevent dam leakage/Quick-fix for leaks
- Alternative primary retention/Clampless alternatives
- Isolating structurally compromised teeth
- Isolation for Class V restorations
- Dealing with the Last-Tooth-in-the-Arch Syndrome
- Using dental dam with fixed bridges and laminate veneers
- Multiple quadrant isolation for sealants/restorations

Who should attend this program

This program is geared for those members of the dental team who have experience in dental dam application and wish to expand their ability in application of this invaluable method of isolation.

Note: This is a hands on program. To reserve a seat for participation in this program an advance deposit of $50 is required which will be returned to you upon completion of the course.

A Dentist, A Lawyer, The College

About the Speaker

In private practice for nearly 30 years, in 2000 Irwin Fefergrad was appointed the Registrar/Chief Executive Officer of the Royal College of Dental Surgeons of Ontario. He has the distinction of being the first lawyer in the history of the Law Society of Upper Canada to achieve a double specialty: one in civil litigation and the other in health law. He is the first Ontario lawyer to receive a specialty in the practice of health law. Irwin is much in demand provincially, nationally and internationally as a guest lecturer in the area of health law and regulation.

A practicing endodontist, Lionel Lenkinski was a founding member of the Canadian Dental Protective Association, a mutual benefit group that provides assistance to dentists with patient disputes and regulatory matters. He has spoken extensively on the subjects of risk management and regulatory compliance, as they relate to dental practice. Lionel has a particular interest in matters related standards of care and conflict resolution.

Mr. Matthew Wilton is a litigation lawyer specializing in health law. He has been assisting dentists in RCDS matters, principal associate disputes and employment law matters since 1991. As a litigator Matthew has appeared before the RCDS Discipline Committee, the Ontario Divisional Court, the Ontario Court of Appeal, the Federal Court of Appeal and the Supreme Court of Canada. Matthew's practice is focused on assisting health professionals including dentists, physicians, psychologists, nurses and physiotherapists.

About the Program

This program will be presented as a panel discussion among the three speakers with interaction with the audience. The panelists will use case histories and examples to illustrate areas of particular interest and concern to practicing dentists with respect to the regulatory environment in Ontario. Common pitfalls, and strategies will be discussed from the perspective of the regulator, a dentist in clinical practice and a defense lawyer.

Program objectives

1. Inform members about the current regulatory environment for dentists in Ontario
2. Identify areas that are more prone to give rise to actions and complaints
3. Provide a basic strategy for regulatory compliance
4. Inform participants about the need for seeking assistance when conflicts arise
5. Illustrate basic strategies to resolve patient issues
6. Outline the differences between the regulatory process and civil actions(lawsuits)

Who should attend this program

This program will be of interest to all members of the dental profession.

Canadian Dental **Protective** Association

Clinicians at the 72nd Annual Winter Clinic

Liz Pearson
Toronto, Ontario

8:45 a.m. – 11:30 a.m.
Room 715A & B
Chair: **Catherine Grater-Nakamura, RDH**

Avoiding Dietary Villains & Choosing Nutritional All-Stars

About the Speaker

Liz Pearson is a Registered Dietitian having received her Bachelor's Degree in Nutrition from Ryerson University and has since become an Award-Winning Speaker, and a National, Bestselling Author. Liz's newest book, "Ultimate Foods for Ultimate Health, and Don't Forget the Chocolate!" recently won the prestigious "Gold" Award from Cuisine Canada recognizing excellence in food writing and food recipes. Liz has a regular segment on CBC News World and has been featured in newspapers and magazines across Canada. Liz was the "Ask the Expert" nutrition columnist for Chatelaine magazine for almost seven years and is also a regular consultant to the food industry.

About the Program

Is your diet filled with harmful ingredients that are damaging your health? Salt has been called one of the deadliest ingredients in the food supply. Too much saturated fat can increase not just your risk of a heart attack, but the severity as well. Trans fats are nasty and some organizations believe sugary foods, like soft drinks, are so detrimental to health they should carry warning labels. Bad food choices damage our health and the health of our children. We can, however, make choices that protect our health? Foods like blueberries, pomegranate juice, broccoli, green tea and even dark chocolate have earned superstar status for their ability to fight disease. This seminar covers them all. You'll find out what foods to eat more of, what foods to eat less of, and how to do it all even within a busy lifestyle. The information is sensible and it's definitely doable. Bottom line: this enlightening, fun and oh-so-revealing seminar makes it easy (and delicious!) to avoid dietary villains and choose nutritional all-stars, even in a hectic world.

In addition, Liz will cover information specific to dental health professionals:

- The link between dental health and disease (including heart disease, stroke, cancer and diabetes)
- Sugary drinks - the leading cause of tooth decay
- The overlooked importance of calcium for healthy teeth and gums
- Obesity: a significant predictor for periodontal disease
- Food & dental health myths and misconceptions
- What you should tell all patients about meal planning and dental health

Learning Objectives:

- increase their intake of foods that protect their health
- decrease their intake of foods that are detrimental to health
- make wise choices even within a busy lifestyle
- better understand the link between food choices and dental health

What type of audience will this program be of interest to?

This program is designed for people who want to protect their health by making the best food choices possible. It is especially geared for people with families who have a busy lifestyle and also for those engaged in counseling others on living a healthy lifestyle.

Gary Marcus, CA, CPA
Toronto, Ontario

8:45 p.m. – 9:45 p.m.
Room 716A
Chair: **Dr. Ron Richardson**

Preparing a Dental Practice for Sale from a Taxation Perspective

About the Speaker

Gary Marcus is a Chartered Accountant, specializing in providing tax consulting, accounting, and buy/sell advisory solutions for the professional service sector and entrepreneurial clients in a variety of industries. His range of advisory services includes due diligence and negotiation support, for buying and selling assets, assistance in securing financing and development of exit strategies and succession planning. With over 25 years experience, Gary is a partner in Meyers Norris Penny LLP. He lectures regularly and has been interviewed for many publications.

Key Points to be discussed

- How is a practice valued?
- What makes a practice attractive or unattractive
- How do you increase a practice's value?
- When is the right time to sell?
- Should you stay on as an associate?
- Tax effect of asset allocations
- Sale of assets vs share sale
- Do you need to incorporate in advance?
- Multiplying the $750,000 capital gains exemption rules
- Partial or transitional sale
- CNIL problem and how to plan in advance to eliminate it

Who should attend this program

If you want to start planning for the sale of your practice in the next 5-10 years, or are currently thinking of selling your practice now this program will provide you with the necessary information to begin the process. It will be also of significant interest to those interested in buying a practice to learn more about how the seller thinks and what would make an offer more attractive.

BONE GRAFTING – THE CHOICES
Blake Nicolucci DDS, London, Ontario

Dr. Nicolucci is an Associate Clinical Professor in Implantology at Temple University in Philadelphia. He is President of the Canadian Society of Oral Implantology, Implant Editor of Oral Health and lectures both nationally and internationally. He is on the Faculty of the Misch Implant Institute in Toronto, and the Canadian Dental Implant institute of Quebec.

"The loss of bone from infection, or iatrogenically from extraction, can leave the restorative dentist with very few prosthetic choices unless bone augmentation is part of the rehabilitation treatment planning. This lecture will introduce some very successful techniques to regain lost bone. This programme will discuss the needs and protocols for successful bone grafting prior to prosthetic care."

PERIODONTIST AND IMPLANT SURGEON – A NEW PERSONALITY DISORDER?
Peter Birek DDS, Toronto, Ontario

Dr. Birek is an Associate Professor in the Department of Periodontics and staff surgeon with the Implant Prosthodontic Unit at the University of Toronto. He maintains a private practice in Periodontics and Implant Surgery.

"The introduction and the wider usage of dental implants lead to a paradigm shift in treatment planning. Heroic periodontal treatments and the use of dental implants with abandon are two extremes that seem to collide and lead to uncertainty in treatment planning. Can they coexist? This presentation will allow participants to reconcile seemingly colliding treatment-planning principles and apply them daily."

TEETH, TRAUMA AND RECONSTRUCTION
Bruce Pynn DDS, Thunder Bay, Ontario

Dr. Pynn is staff oral and maxillofacial surgeon at the Thunder Bay Regional Health Sciences Center, Adjunct Professor, Department of Public Health, Lakehead University and maintains a private practice in Thunder Bay, Ontario. He has published more than 50 papers.

"Proper restoration of facial features and occlusion following severe facial trauma requires co-operation of all the dental disciplines within the community. Completing one of these complex cases often takes two or three years because of the many surgical steps involved, including major bone graft procedures. Several of these trauma cases will be presented to illustrate these steps. The treatment plan in these cases requires extensive consultation with the multi-disciplinary dental team to achieve an optimal result."

LOTIONS, POTIONS, PASTES, AND MORE!

About the Speaker

Sebastian G. Ciancio, D.D.S., is Professor and Chairman in the Department of Periodontology and Director of the Center for Dental Studies at the State University of New York (SUNY) at Buffalo, in Buffalo, New York. In addition he is Clinical Professor in the Department of Pharmacology at the University and a Consultant for the Veterans Administration Medical Center and the Erie County Medical Center.

He has authored or co-authored well over 100 publications pertaining to periodontal diseases. He is co-author of Clinical Pharmacology for the Dental Professional and editor of ADA Guide to Dental Therapeutics. Currently, Dr. Ciancio is Editor of Biological Therapies in Dentistry, a bi-monthly newsletter for dental professionals, Editor of Periodontal Insights, and Consultant for the Journal of Periodontology.

He is Chairperson of the United States Pharmacopeia Convention, Inc., Committee on Revision to Represent Dentistry; Consultant and past co-chair of the Council on Scientific Affairs of the American Dental Association; Past President of the American Academy of Periodontology; President of the American Academy of Periodontology Foundation.

In recognition of his contributions to dental science, Dr. Ciancio has received numerous honors and awards including a Special Citation from the American Academy of Periodontology and Dental Man of the Year Award, presented by Loyola University. He is a leading educator and has presented continuing education courses throughout North and South America, Europe and Asia.

About the Program

This Program is designed to help the dental team update their patients with information on the latest therapeutic, non-prescription oral health-care products as well as prescribed products. This program will review recent developments in chemotherapeutic oral health care products including mouthrinses and dentifrices, and herbal products and agents for management of periodontal disease as part of non surgical treatment of periodontal disease, as well as updating periodontal considerations for implants.

You will learn

- The role of non-prescription dental care products in maintaining oral health
- The role of medications as an adjunct to periodontal therapy
- Periodontal considerations for dental implants

Who should attend this program

When patients ask "What products should I use for better oral health?" we should be able to provide evidence based answers. This progamme will provide all members of the dental team the information we must have to guide ourselves and our patients in the right direction.

Perio Advances – Impact on clinical practice

About the Program

This program will detail the application of new knowledge to periodontal practice in such areas as diagnosis, arrest of disease and regeneration. Also, the program will provide the practitioner with a clinical understanding of the various medications, both locally placed and systemically administered as adjuncts to periodontal therapy. The maintenance of periodontal and implant health will be discussed with the emphasis on factors affecting relapse, as well as the interaction between periodontal and systemic disease.

About the Program

This program will detail the application of new knowledge to periodontal practice in such areas as diagnosis, arrest of disease and regeneration. Also, the program will provide the practitioner with a clinical understanding of the various medications, both locally placed and systemically administered as adjuncts to periodontal therapy. The maintenance of periodontal and implant health will be discussed with the emphasis on factors affecting relapse, as well as the interaction between periodontal and systemic disease.

You will learn

- advances in treatment of periodontal disease
- when to treat and when to refer
- pro's and con's of local and systemic medications
- factors affecting maintenance of teeth and implants
- periodontal disease and systemic health

Who should attend this program

Are your patients and your practice benefiting by knowledge of the latest therapeutic concepts available for use in the prevention and treatment of periodontal disease? This program will be highly valuable to dentists and hygienists engaged in clinical practice.

LAUGHING MATTERS: HUMOUR IN THE WORK-PLACE

Kalman Green
Toronto, Ontario

About the Speaker

Kalman Green is a professional facilitator and popular speaker whose programs have tickled and touched the lives of thousands of people in North America and overseas. Since 1986, Kalman has been leading seminars on a variety of topics that include leadership development, team-building, mentoring, performance management and personal effectiveness. Throughout his career, he has come to see humour as a delightful and powerful way to open doors, minds and hearts, especially in our over-stressed and time-crunched workplace. He is a firm believer in taking his work seriously, but taking himself lightly as he helps people get more "smileage" out of their lives and jobs.

About the program

A recent survey of CEOs reported that more than 98% of them would rather hire somebody with a good sense of humour than someone without one. However, most people equate humour with joke-telling and the majority of people say they can't tell a joke to save their lives. This session will explore numerous ways to invite laughter into your life without being a stand-up comic. You will be encouraged to develop your comic vision and use humour as a problem-solving tool to deal with demanding situations. You will develop a "smile file" that will help you improve communication, build relationships, provide perspective, reduce stress and replenish yourself when your tank is depleted. Through practical examples, sharing of the latest research on the health benefits of humour, actual workplace stories and fun exercises, you will create and take away dozens of ideas to include in your own humour first-aid kit.

Join us and learn how humour

- Facilitates communication by providing a non-threatening medium
- Builds relationships and leads to a sense of staff cohesion in the workplace
- Reduces stress and makes us feel better
- Provides perspective especially in challenging or difficult situations
- Improves the bottom line of any business
- Commands attention
- Boosts your creativity and gives you the energy to think and laugh outside the box
- Helps you laugh with others and not at others so that humour is used as a tool and not a weapon
- Lightens up even the most stressful situations

Who should attend this program

This session is for anyone who wants to add a little more levity to their life and work. Everyone on a dental team will benefit from the many tips and techniques that will be covered, because after all, who doesn't like to laugh!

Note: Because of the interactive nature of this session, this program is limited to 60 participants and will be on a first come basis.

1:30 p.m. – 3:30 p.m.
Room 711
Chair: **Samta Chanana**

Yoga Sutra for Dentistry

Paulette Pillersdorf, DDS
Unionville, Ontario

About the Speaker

Dr. Paulette Pillersdorf graduated from the University of Toronto as a Dental Hygienist in 1974. She went on to complete her training in dentistry and received her DDS also from the University of Toronto in 1985. She has been teaching fitness since 1995 and has been certified by the American Council on Exercise (ACE). Dr. Pillersdorf has been a student of Yoga since 2000 and graduated from the Downward Dog Yoga Teachers Training Program in Toronto. Dr. Pillersdorf maintains a general dental practice in Unionville.

About the Program

Dental professionals are at great risk for repetitive strain injury from sustained postures that we assume every working day. The focus of this presentation will be to introduce participants to a few strategies to 'undo' the injuries that are perpetuated through incorrect or poor positioning. Correct breathing patterns will also be taught to help participants in dealing with the stressful environment commonly encountered in daily professional life.

Relax, Enjoy and Learn

- Identify dysfunctional breathing patterns and learn relaxing abdominal and diaphragmatic techniques
- Identify and correct poor posturing
- Strengthen and increase flexibility in the spine, shoulder and upper extremities

Who should attend this program

Is dentistry a pain in the neck? If you would like to enjoy what you do and be comfortable doing it, this workshop is for you. Whether you are a receptionist, assistant, hygienist, technician or dentist; whether you already are experiencing symptoms or wish to avoid future problems… spend an hour and relax with us.

Note: Special clothing is not required. All stretches taught can easily be performed wearing normal attire.

Clinicians at the 72nd Annual Winter Clinic

Fay Goldstep, DDS
Toronto, Ontario

9:00 a.m. – 11:30 a.m.
Room 717 B
Chair: **Dr. Janice Mummery**

Healing Dentistry… the New Medical-Dental Connection

About the Speaker

Dr. Goldstep has lectured nationally and internationally on CONSERVE-ative Dentistry, Innovations in Hygiene, Dentist Health Issues, Magnification and Office Design. Dr. Goldstep has served on the teaching faculties of the Post-graduate Programs in Esthetic Dentistry at SUNY Buffalo, Universities of Florida (Gainesville), Minnesota (Minneapolis) and UMKC (Kansas City). Dr. Goldstep sits on the Editorial Board of Oral Health Magazine (Healing/Preventive Dentistry) and Dental Tribune US Edition. She is a Fellow of the American College of Dentists, International Academy of Dental-Facial Esthetics and the Academy of Dentistry International. Dr. Goldstep has been a contributing author to 3 textbooks and has published more than 20 articles. She has been listed as one of the leaders in Continuing Education by Dentistry Today since 2002. Dr. Goldstep is a consultant to a number of dental companies and maintains a private practice in Toronto, Canada. .

About the Program

Dental therapy has turned to a new medical model, bringing enhanced treatment for the patient and easier more predictable procedures for the dental team.

This program focuses on the new technologies that have made this possible: New caries detection systems are making caries diagnosis more scientific, accurate, reproducible and clinically significant. Caries detection systems use various forms of light technology from laser to LED to reveal caries at an early stage. These technologies will be compared and evaluated. The diode laser has become the essential soft tissue hand piece for the dental practice. User friendly laser technology keeps periodontal treatment in the general dentist's office. The range of treatment includes crown lengthening, gingivectomies, and troughing of tissues for flawless impressions . The dental hygienist can use the soft tissue laser for bacterial reduction and biostimulation to promote periodontal tissue repair and healing. Photo-activated disinfection can be utilized to promote remineralization and repair of dental tissues. Early interproximal carious lesions can be sealed by a unique new resin infiltration system .The potpourri of ingredients and tools that the dentist and hygienist need for therapies will be described in detail. Know your best fluoride for the job. What is new in remineralization therapy? How can you eliminate white spots? ACP, Recaldent, Novamin: when do you use what?

What you will learn

- What is required for scientific, accurate, reproducible and clinically significant caries detection
- What are the advantages and disadvantages of each caries detection system
- How to treat caries using the medical not surgical model
- What are the ingredients and tools needed for remineralization
- Minimal invasive periodontal therapy
- How to incorporate the new soft tissue laser into the dental and hygiene practice

Who Should Attend this Program?

If you are looking to incorporate new technologies into your practice this programme will introduce you to valuable ideas, concepts and guidance to make the right choice. The material presented will be especially of interest to dentists and hygienists engaged in general practice.

Canadian Academy for Esthetic Dentistry
Académie Canadienne de Dentisterie Esthétique
www.caed.ca

John Collie,
Toronto, Ontario

8:45 a.m. - 9:45 a.m.
Room 716B
Chair: **Dr. Andrew Syriopolous**

The First 10 Minutes Are you Prepared?

About the Speaker

John has nineteen years experience with the Toronto Fire Services and fourteen years on a Heavy Rescue vehicle. John is currently a certified BLS-AED Instructor Trainer with the Canadian Heart & Stroke Foundation and the American Heart Association. He is also an Instructor-Trainer in First Aid with Rescue 7, Health Canada and Human Resources Development Canada. John has completed the Ontario Fire Marshall's Emergency Patient Care Instructor Level (First Responder) Program and is certified in Auto Extrication, High Angle Rescue, Hazardous Materials and Confined Space Entry. John is also a "Train the Trainer" with the Infant Toddler Safety Association of Canada. He is CEO of Rescue 7 inc.

About the Program

The first few minutes after an injury or medical emergency are the most crucial in determining the rate and duration of recovery. Life-threatening emergencies may arise within the dental office. Knowing what to do in the event of an injury or emergency will help you stay calm and take the proper actions and precautions to help the victim have the best chances of a full recovery. This seminar examines the areas that are vital to a proper understanding of emergency medicine: prevention, recognition, preparation and treatment of medical emergencies. Emphasis is placed on the role of the dental staff as the emergency "team" and a review of the office emergency kit (drugs and equipment) will be discussed.

Overview of concepts to be discussed

- Emergency Prevention
- Emergency Kits
- Emergency Procedures.

Who should attend this program

This seminar is geared for every member the dental team.

Sponsored by
Rescue 7

Toronto Academy of Dentistry

Silent Auction

Silent Auction
All registrants will receive Winter Clinic Bucks with their registration package. When you visit the exhibit floor, many exhibitors will be displaying an item of significant value that you may bid on using your Winter Clinic Bucks. There will be many opportunities to obtain additional Winter Clinic Bucks on the exhibit floor both from the exhibitors and at several games located around the hall. Make your bid by signing the sheet at each exhibitors booth and keep coming back to check that you have not been outbid.

At the end of the day, the highest bidder will win the silent auction item and this can be picked up at the exhibitors booth in exchange for the amount in Winter Clinic Bucks of the highest bidder. If the item is not claimed within 10 minutes of closing, the next highest bidder will be able to claim the item. There is no cash value of the Winter Clinic Bucks. If you do not have sufficient Bucks to claim your item you may obtain additional Bucks to cover your bid by playing the games, making a purchase, visiting a participating exhibitor, trading with friends etc. otherwise your bid will not be recognized.

$200 Winter Clinic bucks with registration for dentists!

$100 Winter Clinic bucks for auxiliary staff!

Cruise the Floor and Win More!!

72ND ANNUAL WINTER CLINIC
PHOTOGRAPHY CONTEST
FRIDAY, NOVEMBER 13, 2009

The categories are as follows:

PEOPLE

NATURE

ACTION

Contest Rules:

1. All registrants of the Winter Clinic (Dentists, Hygienists, Assistants, Receptionists Technologists and Exhibitors) are eligible to enter. Entrants must be registered in order to participate.
2. Only three photographs per person allowed. **Entries may be digital or conventional** .
3. Maximum size of the image is 11"x 14". **All images must be mounted on white mat board only.**
4. Maximum size of the mat board (16" x 20).
5. No frames or glass will be accepted.
6. A soft copy must be included with all Digital Picture entries.
7. Entries may be mailed or delivered in person to:

The Toronto Academy of Dentistry
970 Lawrence Ave. W., Ste. 207
Toronto, Ontario, M6A 3B6

Must arrive no later than Friday, October 23, 2009

8. Winners will be announced and prizes will be awarded at 4:30 p.m. on the exhibit floor. All decisions made by the judges are final.
9. All entries may be picked up after 5 p.m. from the display area on the exhibit floor, or at the Academy office after November 13, 2009.
10. Name, Address, and Phone Number of photographer must be printed on the back of each photo.
11. Category and Title to be included with this information.

This form must be included with each entry

I hereby allow the Toronto Academy of Dentistry to use my photograph(s) on their web page, as well as at Winter Clinic or in future Winter Clinic or Toronto Academy of Dentistry publications

Note: The TAD is not responsible for lost, stolen or damaged photos.

Toronto Academy of Dentistry Services & Event

Meetings:
Planning a Meeting? Contact the Academy Office at (416) 967-5649 and we will record the date on the calendar and will inform you if there is a conflict with another meeting. Please advise speaker, location and contact person.

Our website at www.tordent.com lists all dental meetings recorded at our office and is updated regularly.

Website Features include:
- Information on the Academy
- Winter clinic updates and information for delegates and exhibitors
- Members area for the four Toronto Dental Societies
- A comprehensive calendar of all seminars and meetings in the Toronto area
- Hot links to other dental associations
- Members alert button with current up-to-date important information

Contact Us:
For further information on Winter Clinic or any other Academy Event please contact us at:
Phone #: (416) 967-5649
Fax #: (416) 967-5081
E-mail: admin@tordent.com

MEDIATIONS REPORT

Gilbert Chapnick, D.D.S.

The Toronto Academy continues to assist the four Toronto ODA component societies with administrative assistance in the mediation process. Each society appoints a mediation committee of at least three members chaired by a senior member of the committee. When a written concern is raised by a patient and brought forth through the ODA process, the issue is investigated by the commitee of the members component society. The Academy assists in all aspects of the dispute with regards to phone calls, release of information, consent, gathering of details and letters and documentation. The process strictly follows the guidelines established by the ODA and is running smoothly thanks to the dedicated committee members and the Academy staff. Within the last year approximately 20 written complaints have been reviewed most having been resolved satisfactorily.

Good communication, good records and offering treatment within the capabiltites and qualifications of the practitioner will help to ensure a satisfied patient and avoid the stress of mediation that sometimes becomes necessary despite our best efforts. Sometimes a complaint is registered without anticipation, however often times it is possible to recognize an unhappy patient before a complaint is initiated and for these times it is important to seek advice early from the many resources available to us in an attempt to avoid an escalating situation.

Gilbert Chapnick, D.D.S.
Chairman, Mediations Committee
Toronto Academy of Dentistry

You've Helped Us Help Others

The Toronto Community Professional Dental Association was incorporated in 1994, and was created to be utilized for charitable donations only, a commitment the Academy is honoured to be a part of.
Requests for funding must be formally submitted to the Academy office no later than November 15th of each year.

Past endowments include Easter Seal Society, Ontario March of Dimes, University of Toronto, Faculty of Dentistry's Paediatric Clinic, Department of Oral & Maxillofacial Surgery, Daily Bread Food Bank, Kid's Help Phoneline, Women in Transition, Hospital for Sick Children, About Face, Children's Aid Foundation, and Bloorview MacMillan Children's Foundation.

In 2009, recipients from the fund are:

Children's Aid Foundation/Academy's Dental Fund
U of T Faculty of Dentistry Research Program
About Face

The Academy gratefully acknowledges the much appreciated support of both the dental profession and the dental industry.
For the past five years the members of the Academy have participated at the Annual Teddy Bear Affair raising additional funds for the Children's Aid Foundation.

Each Year the University of Toronto, Faculty of Dentistry, awards prizes donated by the Toronto Academy of Dentistry

The awards are given to outstanding students in the Departments of Paedodontics (4th Year), and in Community Dentistry (3rd Year)

The Winners for 2008-2009:

Ms Heather Jones 4th year and
Ms Michelle Wong 3rd year

Toronto Academy of Dentistry Service Award Recipient

Arthur Zwingenberger

Arthur and his wife Dagmar live in Lucerne, Switzerland. His daughter Allison is a professor of radiology for Veterinary medicine at the University of California at Davis. His son Andrew is an economist with an MBA in international marketing from the Erasmus University in Rotterdam. Andrew is working in the family business, SciCan Ltd., and is presently expanding the medical division on an international basis.

SciCan Ltd. was founded in 1957 by Arthur's father Arno Zwingenberger. The company was a Canadian distributor of medical and dental products imported from around the world. After finishing his MBA in economics at U of T, Arthur joined his father with the vision of expanding the dental activities of Lux and Zwingenberger Ltd., as the company was called in those days.

Arno Zwingenberger passed away in 1975, and Arthur has been guiding the firm ever since.

In the late eighties SciCan Ltd. began to morph into the manufacturer and exporter of highly innovative Statim rapid sterilization technology ,which made routine sterilization of ALL instruments in the dental office possible. Statim has become a household word in dental offices but also in Ophthalmic suites, cosmetic surgical suites and in OR's for rapid reprocessing. Statim is sold in 92 countries around the world.

Machine washing of soiled instruments has been SciCan's preoccupation for the last 5 years, and is now becoming the new standard in many jurisdictions. Hydrim is the way to disinfect and wash instruments before sterilization without risk to the dental assistant, and makes validation of the process possible.

SciCan's latest entry in the infection control range of products is Optim, the buffered hydrogen peroxide family of disinfectants, which leave no toxic residues and have extremely high efficacy ratings.

As much as Arthur identifies the milestones in his career with the products brought to market, he never loses sight of the fact that the key to these company achievements has been the team at SciCan that has developed these products, makes them to exacting quality standards and provides service and consulting to our clients.

Our latest achievement in providing value to our dental customer base are the lectures we put on with our dealers, making sense of the complex regulatory environment surrounding infection control , and helping the staff to develop routines to protect patients, staff and practitioner, all the while making sure that the practice is prepared against legal claims.

We look forward to continued challenges in the dental environment, which we will try to master with our wonderful team at SciCan, and with continued close contact with our dental customer base which has been an inspiration for 50 years.

Toronto Academy of Dentistry Honourary Life Membership 2009

Dr Barry J. Sessle

BIOGRAPHICAL SKETCH

Dr Barry J. Sessle is Professor at the University of Toronto Faculty of Dentistry and Faculty of Medicine and a member of the Centre for the Study of Pain, and is the holder of a Canada Research Chair. He is also an elected Fellow of the Royal Society of Canada and member of the Canadian Academy of Science. He is Past-President of the Canadian Pain Society and Past-President of the International Association for the Study of Pain (IASP); he has also served as President of the International Association for Dental Research (IADR) and President of the Canadian Association for Dental Research. His other honours include the IADR Oral Sciences Award, the IADR J.J. Pindborg International Prize in Oral Biology, the Distinguished Career Award of the Canadian Pain Society, Honorary member of the IASP and of the American Academy of Orofacial Pain, and honorary doctorates (D.Sc.) from McGill University and Aalborg University (Denmark). Dr Sessle obtained his dental training from the University of Sydney (Australia) and his Ph.D. in neurophysiology from the University of New South Wales (Australia) in the 1960s. After post-doctoral research at the U.S. National Institute of Dental Research, he joined the University of Toronto in 1971. He was Dean of the Faculty of Dentistry from 1990-2001. Dr Sessle has co-authored or edited 11 books, published over 300 journal articles and book chapters, and delivered over 330 invited lectures in numerous countries; he also serves on the Editorial Board of 8 scientific journals and since 1998 has been Editor-in-Chief of the Journal of Orofacial Pain. His research into orofacial pain and neuromuscular function and dysfunction has been continuously supported for over 35 years by both the Canadian Institutes of Health Research and the U.S. National Institutes of Health.
